

## How2Use

**1** Fill the roller with tobacco, ensuring even distribution, to just under the rolls.

**2** Close the roller and use both thumbs to roll the little mat down, both sides simultaneously.

**3** Place the cigarette paper straight into the groove (the sticky side up and facing you).

**4** Roll the paper up to the sticky side (see pic 4). Wet the sticky strip and roll the cigarette one full turn.

**5** Open the roller, and your perfect cigarette is ready. Fold out the roller and clean it after each use.
